Phone, Harrison 2281-L

READ BEFORE ORDERING

Price of Iris Tubers include delivery.

Where stock permits, 6 of one variety can be supplied at five times the price of one.

Terms: Cash with order or before delivery. It is advisable to send orders early, since stock of some of the rarer varieties is limited. Remittances will be returned, if the order can not be filled.

Every care is taken to send well grown tubers, and these vary in size according to the varieties. The prices quoted are for strong, single rhizomes. If larger divisions are desired, double crowned rhizomes of most of the varieties can be supplied at 50 percent additional to the prices listed. If immediate bloom is wanted, these roots are necessary, as many varieties do not bloom on single roots.

All orders booked in rotation, and plants will be sent out as early as the weather allows, generally early in April.

After the blooming season, many of the iris are re-set. If wanted in large quantities for mass planting, we offer special prices for the summer months.

Mixed, 100 for \$6.00. Our selection of varieties worth from 20 to 35 cents each, labeled, 100 for \$10.00. No less than 50 are supplied at this rate, and postage is extra.

Seedlings. We are growing a number of seedlings from hand-pollinated seed of the finest varieties. Only a few will be kept for naming, the remainder will be sold at \$10.00 a hundred, after the blooming season. Many of these are superior to the average variety, but they are not distinct enough to receive a name, as too many inferior iris are now on the market. A few extra fine seedlings are offered at 50 cents each, \$4.50 a dozen. These will be labeled as to color.

Seed. From fine varieties only, packet 50 seeds for 50 cents. Seed from extra fine varieties, 25 seeds for \$1.00. Ready in August. Some seed of beardless iris are offered at 50 cents a packet, mixed, from fine varieties only.

Culture. Sun and good drainage are essential to all Bearded Iris. Plant tubers on the very surface of the ground. Have the soil well pulverized, and in good condition. Top dress annually with lime and bone meal. Acid phosphate also is a good fertilizer. Lift and divide after flowering every three or four years. Cover with straw the following winter to prevent heaving from frost. After they are established, they need no covering in winter.

LATE-FLOWERING BEARDED IRIS

AFTERGLOW (Sturt.)—Stems well branched, flower soft grey lavender, shading to yellow through the center, strong grower; 3 feet. **\$1.00**

ALBERT VICTOR—S. soft blue, F. beautiful lavender; 3½ feet. **25c**
